📍 Chiang Mai, Thailand

As a web application developer, I am a dedicated and detail-oriented individual eager to contribute my proficiency in PHP and JavaScript, along with expertise in frameworks like React, and Laravel, to a dynamic development team. My commitment to continuous learning is complemented by solid skills in version control using Git and GitHub, as well as a familiarity with Linux environments. With a passion for creating user-friendly websites, I am enthusiastic about leveraging my technical capabilities to make meaningful contributions to innovative web development projects.

🎓 EDUCATION & CERTIFICATIONS

12/2018 – 03/2020 **Bachelor of Business Administration, Yangon University of Economics**
Yangon Second Year

09/2024 – 09/2025 **NCC Level 4, KMD College**
Yangon

09/2025 **NCC Level 5, KMD College**
Yangon

🧠 TECHNICAL SKILLS

Languages — PHP, JavaScript • **Frameworks** — Laravel, React.js • **Front-end Technologies** — HTML, CSS, Tailwind, Bootstrap • **Database** — MySQL • **Tools and Technologies** — Redux Toolkit, Pinia, Axios, Git, GitHub

📁 PROFESSIONAL EXPERIENCE

02/2024 – 02/2025 **Junior Backend Developer, Airyno, Yangon, Myanmar**

- Played a key role in developing the **complete dashboard and backend system** for the educational platform **Jaraye**, using the **TALL stack** (Tailwind CSS, Alpine.js, Laravel, Livewire).
- Built and optimized backend logic, database structure, and user management features to ensure smooth platform performance and scalability.
- Integrated **Flowbite** UI components with **Tailwind CSS** to enhance the admin dashboard's design consistency and responsiveness.
- Collaborated closely with frontend and design teams to deliver seamless user experiences through efficient data communication and well-structured APIs.

- Contributed to a **chatbot project**, focusing on general backend processes such as authentication, database management, and endpoint creation (excluding AI/NLP logic).
- Maintained high code quality through peer reviews, documentation, and continuous improvements based on project feedback.

KEY SKILLS AND ATTRIBUTES

Problem-solving

Demonstrated ability to solve challenges encountered during project development.

Team collaboration

Worked effectively within a team environment to achieve project goals.

Self-motivated

Independently initiated and completed projects, showcasing initiative and determination.
